# North Carolina Immunization Program Refrigerated Vaccine Temperature Storage Log 

Required to be maintained for 3 years
Post on or near the vaccine storage unit and use to record required recordings of AM and PM temperatures for vaccines

## Requirements:

- Read and manually record temperatures twice each day; once at the beginning and again at the end of the day
- Record from an interior thermometer with a current certificate of calibration in accordance with National Institute of Standards and Technology (NIST)
- Refrigerator temperature must be maintained between $2^{\circ} \mathrm{C}$ and $8^{\circ} \mathrm{C}\left(35^{\circ}\right.$ and $\left.46^{\circ} \mathrm{F}\right)$ with an optimum of $5^{\circ} \mathrm{C}\left(40^{\circ} \mathrm{F}\right)$
- Normal readings are $2^{\circ}, 3^{\circ}, 4^{\circ}, 5^{\circ}, 6^{\circ}, 7^{\circ}, 8^{\circ} \mathrm{C}\left(35^{\circ}, 36^{\circ}, 37^{\circ}, 38^{\circ}, 39^{\circ}, 40^{\circ}, 41^{\circ}, 42^{\circ}, 43^{\circ}, 44^{\circ}, 45^{\circ}, 46^{\circ} \mathrm{F}\right)$
- Each temperature reading be accompanied by the time of the reading and name (or initials) of the person who assessed and recorded the reading - CDC recommends that providers record the minimum and maximum temperatures once each workday (preferably in the morning)
- Take immediate action when temperatures are out-of-range. Isolate the affected vaccine vials or packages, mark "DO NOT USE," and store the vaccines under appropriate conditions in a properly functioning vaccine storage unit. Call the MFG at 800-822-2463 for assistance and document on the temperature log any actions taken regarding the out of range temperatures.

## Facility Name

| Day | Date | AM Temperature |  |  | PM Temperature |  |  | Minimum/Maximum Temperature |  | Comments |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
